

GOOSENECK INDUSTRIAL LIGHT

NEW!
FROM TRI LITE

The Tri Lite Gooseneck is the Ideal Solution for Both Dock and Task Lighting Applications

- Robust light fixture with flexible stainless steel arm that will not sag
- Rugged arm assembly incorporates flexible conduit with a steel elbow that simplifies positioning
- Models available with LED bulb or with user supplied incandescent bulb
- No internal cooling fan required; reducing energy consumption
- Impact and heat resistant polycarbonate light head remains cool to the touch
- UL and cUL certified for safe operation
- All components field replaceable
- Fast and easy to install on any vertical surface
- Designed and assembled in the USA

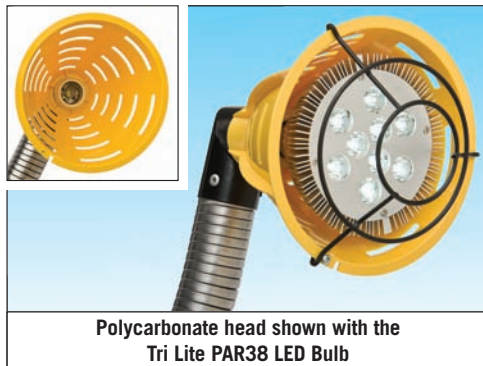

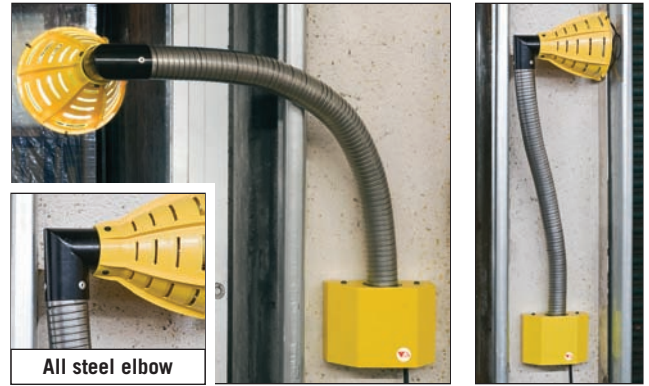

*Positioning Your Dock Light
Has Never Been This Easy!*

Unique Flexible Stainless Steel Arm Features:

- Low profile and easy positioning
- Will not sag
- Can be rotated 180 degrees for use in any direction
- Extends 27" above housing, easily bending around most dock door tracks
- 2" industrial grade stainless steel conduit
- Bendable over the entire length
- All steel elbow to simplify positioning

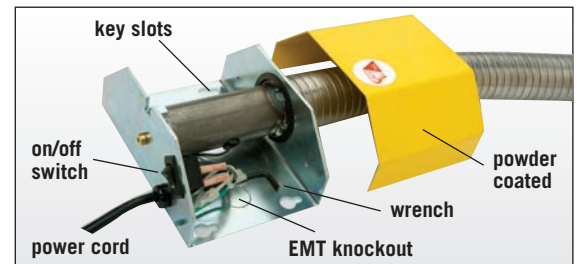

Polycarbonate head shown with the
Tri Lite PAR38 LED Bulb

Impact and Heat Resistant Polycarbonate Light Head:

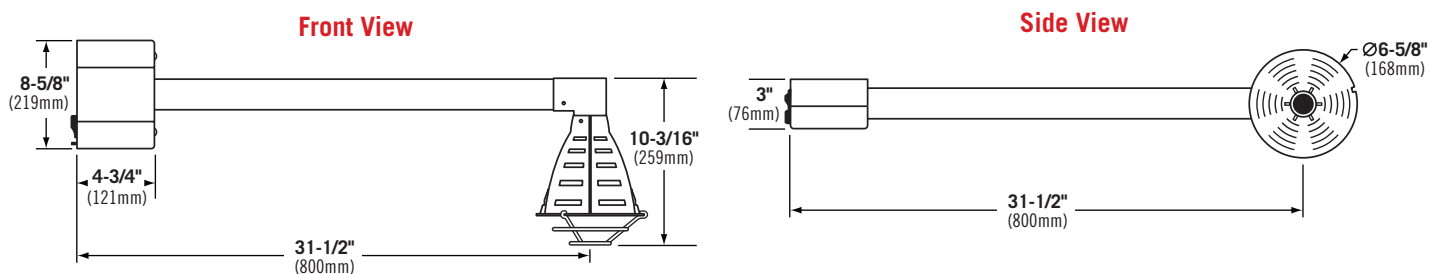

- DLGN-120-PLD model supplied with PAR38 LED bulb; uses 18 watts of power, but provides as much light as 150 watt incandescent bulb. 3 year warranty on bulb
- DLGN-120 model is used with customer supplied PAR38 bulb (150 watt maximum)
- Cool to the touch and vented to increase bulb life
- Lamp housing uses durable UV stabilized Polycarbonate Material
- Supplied with wire guard that can be fastened to the light head for bulb security
- Field replaceable heavy duty lamp socket

All Steel Housing Includes:

- Conveniently placed on/off switch
- Six foot power cord with strain relief and NEMA 5-15 plug
- Four key slots for easy mounting
- EMT knockout on back of housing for hardwire mounting
- Corrosion resistant mounting box with powder coated safety yellow cover
- Storage clip for unique wrench used to secure wire guard
